# Vikas Kushwaha

Résumé
https://csstudent41.github.io

# TECHNICAL SKILLS

- **Work Flow**

  I don't use Windows Operating System very often but I don't mind working on it.
  - **OS :**  Linux
  - **Window Manager :**  i3
  - **Text Editor :**  vim
  - **Remote Management :**  ssh, tmux, git, rsync, syncthing

- **Languages**

  Languages are listed in order of competence.
  Note that this document is written in LaTeX.
  - **Programming :**  C, C++, Go, JavaScript
  - **Scripting :**  Shell, Python, Awk, R
  - **Markup :**  HTML, CSS, LaTeX

# EDUCATION

- **Degree**

  Currently pursuing B.Sc. in Computer Science from Annasaheb Vartak College, Vasai West, Mumbai, Maharashtra, 401 208. (`https://avc.ac.in`)

# WORKS

- **Websites**

  I have built some production ready websites, static as well as dynamic.

  Here's my personal website built by myself. It's build using hugo, a static site generator:-
  URL:     `https://csstudent41.github.io`
  Source:  `https://github.com/csstudent41/hugo-site`

  I worked on organizing a tech fest event in my college. It was titled as 'BITS'. I and my friend built the landing page for BITS which was the gateway for user registrations :
  URL:     `https://bits24.onrender.com`
  Source:  `https://github.com/vtc-tech/vtc-tech.github.io`

- **Linux**

  I am well versed in usage and management of the Linux Operating System. I am using it as my daily driver for over a half a decade now. You can find my Linux Configurations and scripts on GitHub:-
  `https://github.com/csstudent41/voidrice`

- **Scraping**

  I scraped my college's exam results which are rolled out in PDF format and turned it into friendly HTML tables showing final scores of each student in a single list. It's available on my website:-
  `https://csstudent41.github.io/results`
  The raw PDF files are uploaded to Google Drive :-
  `https://tinyurl.com/vartakdrive`
  The scripts used to scrape the PDF documents and build the HTML DOM are in my vartak-bin repository. It also contains some other stuff that I use to manage my college files generally. The files that we care about are named as vartak-results-*
  `https://github.com/csstudent41/vartak-bin`
